Xpiori Opens Denver Office for Legal eDiscovery Products and Services

[See the release on PRWeb](#) ^[1]

DENVER, Colorado – May 9, 2012 – Xpiori, a leading provider of eDiscovery products and Technology Assisted Review services for law firms and corporations, announces the opening of its Denver office to service Colorado and national client base. The office will be led by [John Hauber, Xpiori's Director of Sales](#) ^[2]. Hauber joined the company in early 2012 and has more than 10 years of sales experience in the software, hardware and SaaS markets.

The Denver office contact info is:

Tim Dix
Xpiori, LLC
T: 719-425-9840

Xpiori is a partner of OrcaTec and value-added reseller of its [OrcaTec Document Decisioning Suite](#) ^[3]™. The suite includes predictive coding, concept search and clustering features. Xpiori is also a Nexidia licensed partner, offering the [Nexidia Audio Discovery OnDemand](#) ^[4]™ web-based service that provides fast phonetic discovery and analysis of audio files without conversion to text. In addition, Xpiori develops eDiscovery solutions, including its [FirstCull](#) ^[5]™ early case assessment tool for analysis of unstructured information and [XCM](#) ^[6]™ (Xpiori for Content Management) appliance.

Xpiori has recently completed several transactions for its hosted Technology Assisted Review service with predictive coding. Tom Haskins, Esq., of Silver & DeBoskey, a Denver-based law firm, observes, "We were able to use the Xpiori Technology Assisted Review service in a recent case. We anticipated that manual review of the Discovery documents would cost well in excess of \$100,000. However, with Xpiori, we were able to reduce those costs to less than a third of what we had budgeted. Using the OrcaTec suite offered by Xpiori has been a massive cost-saver. The products are easy to use, very flexible and fast."

"Content review in eDiscovery has become an enormous and costly exercise. It's not uncommon for a case to require review of hundreds of thousands of documents, if not millions. Manual review is just too expensive and time consuming. In addition, independent studies show that our predictive-coding based automated review is far more accurate and done at computer-driven speeds," explains Tim Dix, CEO of Xpiori. "Courts are now responding positively to predictive coding. Our partnership with OrcaTec enables our delivery of a best of breed product and service."

“Predictive coding has become a ‘must have’ for eDiscovery because it saves companies so much time and money, while actually increasing review accuracy,” notes Arnaud Viviers, CEO and President of OrcaTec. “Xpiori clearly recognizes this, and by adopting OrcaTec’s advanced technology, including predictive coding, is improving client service by giving attorneys and corporations what they’re asking for.”

OrcaTec, based in Atlanta, is a leading provider of technology, products and services for visually, defensibly and automatically revealing information that is precise, insightful and expert driven from large collections of electronic documents. Leveraging the topic-based OrcaTec Document Decisioning Suite, OrcaTec enables eDiscovery and information governance with demonstrably high levels of accuracy, while reducing the time, cost and effort of analyzing, categorizing and retrieving documents by as much as 93% compared to alternative technologies. For additional information on OrcaTec, visit www.orcatec.com [7].

Xpiori, LLC

Xpiori is a privately-held company headquartered in Colorado Springs, CO. The company has developed proprietary technologies, products and services for the eDiscovery, compliance and review markets since 2006, as well as for XML-based data management. Xpiori supports the OrcaTec Document Decisioning Suite and OrcaTec Echo™ for email archive analysis as part of its offerings. Discover more about Xpiori’s offerings at www.xpiori.com [8] or call 719-425-9840.
