

Xpiori, LLC now offering the OrcaTec™ Appliance

The OrcaTec ODS-100 is available as a rack-mount or stand-alone appliance, fully loaded with OrcaTec Document Decisioning Suite™ and ready for installation behind the firewall in your Enterprise IT environment. This comprehensive eDiscovery solution for Technology Assisted Review with Predictive Coding provides capacity of 2, 3 or 4 TB standard, with 36-60 month leasing available at very competitive rates.

POWERED BY

Cost Savings and Opportunities For Efficiency

- Existing customers – both law firms and in-house counsel – report that the Document Decisioning Suite pays for itself in just a few months – often within a single big case
- Eliminates fees and notoriously inaccurate cost estimates from Legal Processing Organizations by providing a more cost effective solution that can be implemented in-house with existing staff and/or a limited number of contract reviewers
- Law firms can offer corporate customers a cost effective solution that will lower overall costs and demonstrate sensitivity to the current high costs associated with eDiscovery
- Improved efficiency through a single, unified eDiscovery solution that can be accessed by all litigation team members – associated with the law firm or the client – through a secure browser based access
- Ability to efficiently handle increasing amounts of ESI that organizations continue to create
- For both large enterprises and smaller organizations, all-in-one software and hardware, preconfigured solution will save time and resources assuring timely performance and accurate response for eDiscovery, compliance and other heavy ESI review projects
- Complete review of millions of documents in only a few days – accurately and behind your own firewall

Comprehensive Features

Technology Assisted Review including concept search, clustering and predictive coding along with advanced analytics tools working together to reduce the time, cost and effort of eDiscovery.

- Predictive coding through random sampling by rating documents as responsive or unresponsive to create exemplars that are used to assess the entire data set – no keywords or seed documents required ^[1]
- Extraordinary graphical representations of timelines, communication networks, and relationships reflecting time dimension
- Exploration tools include clustering, concept search, interesting phrases, search suggestions, spelling suggestions, advanced search with inclusion/exclusion set capability, timelines, social sonar, and communications networks
- Concept search module was conceived and engineered by the inventor who created the concept
- Clusters and social network sonar show how documents and people related to each other;
- Issue and privilege tagging; review and redaction of results; and robust review analytics
- Automated dedupe including hyper-dupe for exact duplicates, near dupe analysis, and much more

Configuration

- Rack-mount or stand alone, fully loaded with OrcaTec Document Decisioning Suite™
- Available in 2, 3, and 4 TB capacity for installation behind the firewall
- Management available from the Xpiori/OrcaTec Team for first 60 days as part of the Maintenance Program
- Pricing at \$300,000 (2TB), \$350,000 (3TB) and \$400,000 (4TB) with 36 to 60 month leasing available at very competitive rates
- Ingests eDiscovery or other big data sets, removes system files and extraneous data
